

# Making a World of Difference

We provide a continuum of core EAP services including:

- Individual assessment, brief counseling (up to 8 sessions per employee per problem) and referral services if needed—mental health services, alcohol and drug services, work/life services, performance improvement/performance management
- Work/life services
- Conflict resolution education and intervention
- Supervisory consultation regarding work performance issues
- Management coaching and employee training (prevention focused)

Enhanced AEAS services include:

- Workplace trauma counseling services
- Leadership development services
- Substance abuse professional assessment and case management
- Career and outplacement counseling

Our competitive rates and contribution to benefit cost containment make AEAS' comprehensive services a logical choice for a great return on investment.

# Where in the World to Call for Help

Associated Employee Assistance Services (AEAS) was created in the mid 1980's as a collaborative effort of several mental health agencies in Central Wisconsin. We are now a wholly owned subsidiary of Ministry Behavioral Health, Ministry Health Care, sponsored by the Sisters of the Sorrowful Mother.

AEAS specializes in Employee Assistance Programs, organizational training and consultation services. We are committed to providing hi-tech access and hi-touch service to organizations we serve.

Customized services are available to meet the needs of both small and large organizations. Our comprehensive provider network offers accessible services to employees and organizations throughout the United States.

As employees and family members become more familiar with an EAP, they begin to see it as an indication that their company cares enough about their welfare to provide such a comprehensive service. The organizations we serve do indeed believe that their employees are their greatest assets.
